INTERNSHIPS AND CERTIFICATIONS

INFOSYS SPRINGBOARD INTERNSHIP 6.0

Java Developer Intern | Springboot, PostgreSQL

- Built a backend system handling 100+ grievances, enabling citizens to submit and officers to track and resolve issues.
- Developed 10+ REST APIs with role-based access and JWT authentication for secure operations.
- Collaborated in a 10-member agile team to build and deploy a functional prototype.

CS50X – HARVARD (EDX)

Introduction to Computer Science

- Learned core computer science principles: algorithms, memory, recursion, and web technologies. Solved 10 problem sets using C, Python, and SQL. Final Project: Built a task management web app with HTML, CSS, and JavaScript.

INFOSYS SPRINGBOARD – Java Foundation, Cyber Security Foundation.

PROJECTS

Secure File Sharing and Storage Vault | Spring Boot, PostgreSQL | GitHub 

- Built a secure file management platform using Spring Boot and PostgreSQL for uploading and accessing files.
- Implemented JWT-based authentication and API security mechanisms to protect user data.
- Designed password-protected sharing links with one-time access and download limits to prevent misuse.
- Applied rate limiting (10 requests/sec) to handle traffic spikes and prevent system abuse and enabled chunk-based file uploads to support large file transfers reliably.
- Integrated AWS S3 for scalable storage and deployed using Docker on Microsoft Azure with CI/CD via GitHub Actions.

PDF & Image Processing Desktop Application | Python | GitHub 

- Developed a Python-based desktop application for PDF and image processing (merge, split, compress, convert).
- Implemented file compression techniques to reduce size while maintaining document quality.
